Personal Summary

Motivated software engineer eager to apply my technical and organisational skills in various environments to bring about productive solutions. Currently seeking opportunities to apply and expand my skills and portfolio while facilitating company growth

Experience

Garage Mobility - 2022

- Built consumer-facing website using React js
- Worked with a team of developers to improve company's software suite with a focus on development of the frontend UI.
- Designed graphics used in frontend UI with photoshop
- Collaborated with developers for backend development of API

Digital Placeholder - 2020

- Built consumer-facing website using HTML, CSS, Javascript
- Developed SMS app for bulk client communications using PHP
- Designed graphics used in frontend UI with photoshop

Personal Projects

Restaurant App - Jan-Mar 2023

Developed a mobile app that enable restaurant owners to easily onboard and manage their business seamlessly without setting up expensive work station. The app enable servers to take orders from customers and the backend servers can immediately see orders on their dashboard.

The app also generate report for the business owner.

The app is accessible on the Expo store. To access the app, users have to download **Expo Go client** on their phone and access the app by entering **@muscoff/Muchie** at where it says Enter URL manually.

Tech Stack in use - **React Native, Google Cloud Firebase Service**
