Personal Data

Nationality - Ghanaian
Language Proficiency - English

Education

Bsc Computer Science
University of Ghana - 2016

Technical Skills

Frontend
HTML, CSS, Javascript, (React - Intermediate)

Backend
Node/Express JS, Vanilla PHP, Django - Intermediate

Desktop App Development
Electron JS - Intermediate

Database
MySQL - Intermediate

Basic knowledge in Python, React Native, Flutter

Graphic Design
Adobe Suite
Photoshop - Intermediate
Illustrator, After Effect, XD - Basic

Personal Summary

Motivated software engineer eager to apply my technical and organisational skills in various environments to bring about productive solutions. Currently seeking opportunities to apply and expand my skills and portfolio while facilitating company growth

Projects

Restaurant Desktop App

Quickly learned Electron JS to build a desktop app for a client. The app was to enable the client keep track of sales and also print receipts to customers. Improved the app to accept digital payment and data visualization of sales transactions.
Tech Stack used - **HTML**, **CSS**, **Javascript**, **PHP**, **Electron Js**, **Chart JS** and **PayStack payment gateway**.

App Setup - https://youtu.be/s-rERFQUZx8
Sales Transactions - https://youtu.be/Wy4EvVyo89Q
Data Visualization - https://youtu.be/Fu-0pcdXkNg

Digital Placeholder

Built and launched Bulk SMS web app with API integrations for PHP and Javascript. Registered users are able to upload a text file that contain contact numbers to send Bulk SMS to or save contacts on the server. The Web API enable registered users to integrate the API in their website to send messages from their website. Project currently on hold.

Enemy

Built a mockup of US based company website called Enemy. The orignal website was not using state manager to handle the cart items hence lack of smooth update of cart value. This mockup tackles that problem.
Tech Stack Used - **React**, **Node/Express JS**, **Stripe API**
